MailFrom: upgrade@abihosting.com
Subject: Upgrade information - Online tools demonstration sessions

Dear ABI Hosting Customer,

You are invited to a demonstration of the new tools and services ABI hosting will be offering as of the 29th of May 2009 as part of the upcoming service upgrades.

The presentation will cover the following topics:
- WebsiteOS - A one stop control panel to manage your web services
- Webmail - Our new webmail interface designed to be more user friendly and respond to your commands faster
- WebsiteOS tools - EasyMail Setup, DNS Manager, FTP Manager, SSL Manager and much more

There will be two online sessions:

1. Title: "ABI Hosting Tools Demonstration"
Date: Tuesday, May 19, 2009
Time: 3:00 PM - 4:00 PM EDT

Register now by clicking the link below:
https://www2.gotomeeting.com/register/438903339

2. Title: "ABI Hosting Tools Demonstration"
Date: Friday, May 22, 2009
Time: 12:00 PM - 1:00 PM EDT

Register now by clicking the link below:
https://www2.gotomeeting.com/register/511363699

You can visit http://faq.abihosting.com/ to stay up to date on any upgrade related information and view past upgrade related notifications.

We would also like to take a moment to remind you of the DNS changes you are required to make as part of this upgrade. As a part of this transition, we no longer support private IP addresses unless you have your own private SSL certificate. After the upgrade your DNS will need to be pointed to the new shared hosting IPs:

- 64.29.145.9 for standard hosting customers
- 64.29.145.10 for domain pointing / host header sites
- If you currently have an SSL certificate you will be notified ahead of time with your new private IP. If you do not recieve this information by the 25th of May, please contact upgrade@abihosting.com

You should not make any DNS changes to your site until 8pm EDT May 29th 2009.

If you previously had no domain associated with your private IP you can now access your website using the following format:

legacy.legacyIP.abiaccess.com i.e. legacy.123.123.123.123.abiaccess.com

If you are referencing your IP within your code, please contact our upgrade team for a workaround by email at upgrade@abihosting.com

For any upgrade related questions you can email upgrade@abihosting.com before or after the meeting.

We look forward to seeing you in our online meeting!

Kind regards,

ABI Hosting Customer Service
